

POWER
RMS 150 w
MAX 300 w

SPECIFICATIONS

MAX ASB1-10

Component	Active slim subwoofer
Size	10" (250mm)
Power RMS*	150W
Power MAX*	300W
Freq. response	20-150Hz
Low pass filter	50-150Hz
Subsonic filter	25Hz (fixed)
Crossover slope	12dB
Bass EQ	0-12dB @ 45Hz
Phase	0/180

S/N ratio (A-weighted)	>98 dB
Damping factor	>125
Input sensitivity	0.15-6V
THD+N	<0.3%
Power voltage	10-16V
High level input	Yes, auto on/off
Low level input	Yes
Bass Remote	Yes, level
Fuse	1x15A

* Power @ 14.4V / 1% THD

MAX ASB1-10

IMPRESSIVE COMPACT BASS

We want everyone to have access to truly great sound - even if it's in a small car or you need the space in your trunk. Our engineers worked hard on how to manifest the MAX experience in a compact format that's so small it fits under a seat. The MAX ASB1-10 was designed to test the limits and is packed with a lot of power, bass and an impressive performance to fulfill your need for high quality bass.

OPTIMIZED POWER

The subwoofer is equipped with a powerful Class AB amplifier that allows for better subwoofer low end control technology. Together with its enhanced performance, the amplifier can deliver up to 150W (RMS) directly to the 10" woofer. We know that LOUD is not good enough for you, not without the performance to match it. To make sure that the bass matches your sound system, we've included customizable settings such as a low-pass filter, bass EQ and 0°/180° phase shift control.

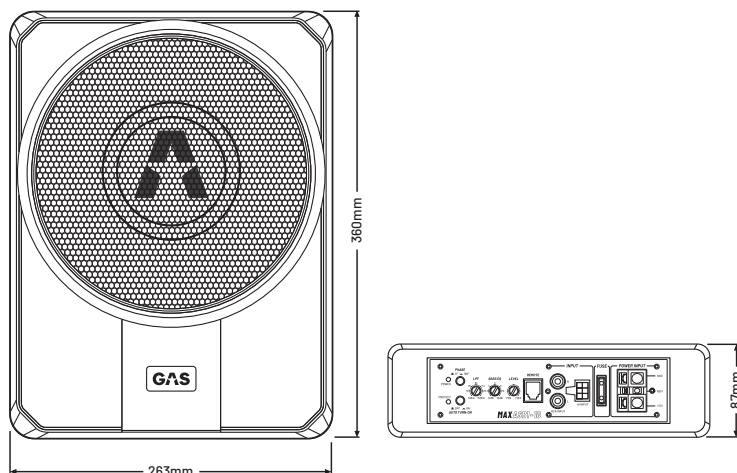

SIMPLE INSTALLATION

When we say that everyone deserves great bass, we mean it. To achieve this, we made sure to make it easy for you to integrate the ASB1-10 with your current sound system. You won't even need a new head unit to connect it. There are two methods you can use: Low level (by using the RCA pre-out) or High level (by using the speaker cables). If you use the High-level input, the best-in-class pre-amplifier with Auto Sense Circuit allows the amplifier to turn on and off without the need for a remote turn on wire. It almost sounds too easy, right?

FULL CONTROL

During your cruising or longer road trips you might want to listen to different kinds of music, and that shouldn't be an obstacle. The included bass remote gives you full access to adjusting the bass level whenever you want to.
